QUALITY ASSURANCE LEAD

Committed to delivering high quality software products through effective testing strategies

QA Lead with 17+ years of experience leading manual and automation testing initiatives across banking, healthcare, mortgage, and enterprise applications. Strong expertise in Agile QA delivery, test strategy, defect management, backend validation, API testing, and driving high-quality software releases through continuous process improvement.

TECHNICAL ACUMEN

Test Automation Tools: UFT, Selenium WebDriver/Grid, Playwright

Test Management & Defect Tracking Tools: JIRA, ALM, Rational Quality Manager, Silk Central, Rational ClearQuest, Lotus ProSupport

API Testing Tools: Postman, SOAP UI, Parasoft

Version Control: GitHub, WinCVS

Databases & SQL Tools: Oracle SQL Developer, TOAD, SQL Navigator, AQT, XQMF

RDBMS: Oracle, SQL Server, DB2, MySQL, MS Access

ETL Tools: Informatica PowerCenter

Programming Languages: Java, Python, SQL, Shell, XML, HTML

Operating Systems: Linux, UNIX, iOS

Scheduling Tools: Autosys, Control-M

CRM & Enterprise Platforms: Salesforce (Lightning), Siebel, .NET, Mainframe, ICMS

Project Management Tools: MS Project, Attask

Comparison Tools: WinDiff, Altova DiffDog

Cloud Technologies: AWS

Signature Strengths:

- Leadership & Mentorship ♦ Test Management ♦ Test Automation ♦ Manual Testing & Test Strategy Development
- ♦ Extract, Transform Load (ETL) ♦ Continuous Integration/Continuous Deployment (CI/CD) ♦ Programming & Scripting
- ♦ SQL & Database Testing ♦ Agile Methodologies ♦ Software Development Life Cycle (SDLC) ♦ API ♦ Salesforce

PROFESSIONAL EXPERIENCE

PROFESSIONAL DEVELOPMENT

OCT 2024-PRESENT

- Leveraging emerging AI testing tools and continuous learning to improve software quality, reduce testing gaps, and prevent production defects.
- Expanded cloud expertise by completing AWS Developer Associate coursework with hands-on experience in cloud-native development.
- Enhancing automation skills by developing Python applications and gaining experience with Playwright for end-to-end test automation.

PERSONAL SABBATICAL

JULY 2023 -SEP 2024

NORTH CAROLINA ADMINISTRATIVE OFFICE OF THE COURTS, USA

NOV 2019 – JUN 2023

QA Lead

Selected Career Benchmarks:

- Spearheaded QA initiatives by aligning testing strategies with business objectives, leading a team of 6 QA engineers, ensuring comprehensive test coverage through detailed project documentation and test plans, resulting in a 20% improvement in test efficiency.

- Collaborated with developers and stakeholders to analyze complex business requirements and develop effective testing strategies for high-quality judicial application releases.
- Contributed to Agile Scrum ceremonies, including Sprint Planning, Daily Stand-ups, and Review Sessions, while designing detailed test scenarios, test cases, and test procedures based on user stories.
- Executed multiple testing types, including Sanity, Smoke, UI, Functional, and Regression testing, enabling early defect detection and validation against business requirements.
- Improved system reliability by testing ICMS configurations and validating solutions for the Odyssey application across Test, Stage, and Production environments.
- Developed and maintained Requirement Traceability Matrices (RTMs), improving traceability, accountability, and test coverage throughout the QA lifecycle.
- Maintained a high-impact test suite covering core business workflows, including case filings, document management, and approval processes.

DUKE CLINICAL RESEARCH INSTITUTE, USA

JAN 2016 – JUN 2019

QA Lead

Selected Career Benchmarks:

- Conducted in-depth analysis of requirement documents in Blueprint, collaborating with Business Analysts to refine Software Specification Documents and ensure alignment with business needs.
- Led QA efforts for clinical trial and non-trial projects, coordinating with cross-functional teams to support integration of patient management and healthcare workflows while ensuring high-quality deliverables.
- Designed and implemented automation frameworks using Selenium WebDriver and Java, reducing manual testing effort by 60% for Salesforce Health Cloud and Service Cloud.
- Automated end-to-end validation of Lightning UI workflows, patient billing modules, and critical clinical processes, ensuring compliance with HIPAA and healthcare standards.
- Developed data-driven testing strategies in Selenium to validate patient demographics, lab results, treatment plans, and clinical workflow integrity.
- Engineered SQL scripts for backend validation and data consistency checks, and supported automation of Rave and Rave X applications using a keyword-driven framework in UFT.
- Performed REST and SOAP API testing using Postman to ensure secure data exchange and system integration across clinical applications.
- Prepared Operational Qualification Summary Reports and approval packages, supporting production release readiness while following Agile practices, risk assessments, and peer reviews.

COMPUTER SCIENCE CORPORATION, USA

OCT 2014 – APR 2015

Senior QA Tester

Selected Career Benchmarks:

- Analyzed Project Design Documents for Health Services, ensuring clarity in project objectives and aligning the organization for growth and quality enhancement.
- Developed and executed Test Plans, Scenarios, and Cases for Prior Approvals and Claims using X12 standards, ensuring data accuracy and system functionality.
- Led defect triage and issue resolution in Silk Central, managing defects and providing regular project status updates to ensure alignment with goals and effective communication.

IBM Seterus, USA.

AUG 2013 – MAR 2014

Senior QA Engineer

Selected Career Benchmarks:

- Analyzed mortgage letter requirement documents and managed project documentation and tasks via SharePoint, ensuring alignment with project objectives and timely execution.
- Developed comprehensive Test Plans, Scenarios, Cases, and configured test data based on Functional Specifications and BRD to ensure full test coverage.
- Utilized Autosys GUI for job scheduling, optimizing test execution efficiency and maintaining stable workflows.

- Created SQL scripts for back-end validation, ensuring data integrity and system performance across databases, and tested interactions between PULSE and WILMA using UNIX commands.
- Performed ETL testing with Informatica Power Center, validating data accuracy and integrity across various source files; Led UAT testing with stakeholders, ensuring project alignment, and provided training on Wilma letter testing for effective knowledge transfer.

ORACLE FINANCIAL SERVICES, INDIA
Senior Consultant

JUL 2012 – DEC 2012

Selected Career Benchmarks:

- Analyzed client requirements, developed test plans, scenarios, and cases based on Functional Specs and BRD, and executed rigorous testing for business enhancements.
- Logged defects in HPQC, collaborated with teams for issue resolution, and provided stakeholders with test execution reports and status updates to align testing with business objectives.

HCL TECHNOLOGIES LTD, INDIA
Sr. QA Engineer

MAR 2010 – MAY 2012

Selected Career Benchmarks:

- Led QA efforts across multiple projects, mentoring teams, analyzing requirements, and driving end-to-end testing, including SQL-based database and file-format validation (EDIFACT, SWIFT, SEPA XML).
- Managed defect triage in HPQC, executed automation regression testing using UNIX and CPT, prepared QA reports and artifacts, and supported CMMI Level 5 governance through Fishbone analysis and CAPA.

FIDELITY BUSINESS SERVICES, INDIA
Associate Test Engineer

APR 2007 – MAR 2010

Selected Career Benchmarks:

- Developed test scenarios, cases, and scripts based on Functional Specs and BRD, leading functional and regression testing for Oracle OAB GUI and Net Benefits web applications.
- Executed automation and manual testing with QTP (VBScript), Parasoft SOAP UI, and ETL jobs for database validation, managed defects in Lotus Prosupport and HPQC, and collaborated with US teams for issue resolution and team training.

VOLUNTEER WORK

OCT 2024 - PRESENT

- Serving as Secretary for the PTA Executive Board at a Wake County Magnet School for the year 2026-2027.
- Actively engage in tech meetups and professional networking events while volunteering at AI and technology conferences, supporting operations and attending technical sessions to stay updated on emerging technologies and industry trends.
- Strengthened community engagement by designing and delivering QA training sessions and leading end-to-end testing for Greater Carolina Kerala Association website.

CERTIFICATIONS & EDUCATION

Scrum Master Certified (Certificant ID:001614043) | **ISTQB Certified** | **ANIIT certified** (NIIT, India)
Bachelor of Engineering in Computer Science & Engineering | Jayamatha Engineering College affiliated with Anna University, Chennai, India
